Introducing the new invisible cook kitchen

High end technology in absolute combination
with Candia Mega Slabs products,
As a result using the latest technology, we bring
elegance and innovation to your building.

We are excited to elevate
your kitchen experience with the
Countertop Invisible Built-In
Induction Hob Cooktop.

Experience a New Level of Cooking

**Seamless Integration
Modern Kitchen**

Candia Mega Slabs has long been the top choice for kitchen countertops due to its durability, resistance to heat, stains, and scratches. It is also moisture-resistant and easy to clean, making it ideal for any kitchen environment.

Combination of our Candia Mega Slabs with cutting-edge induction technology, which operates through a sophisticated magnetic field, you will enjoy seamlessly prepare, cook, and dine in the same area.

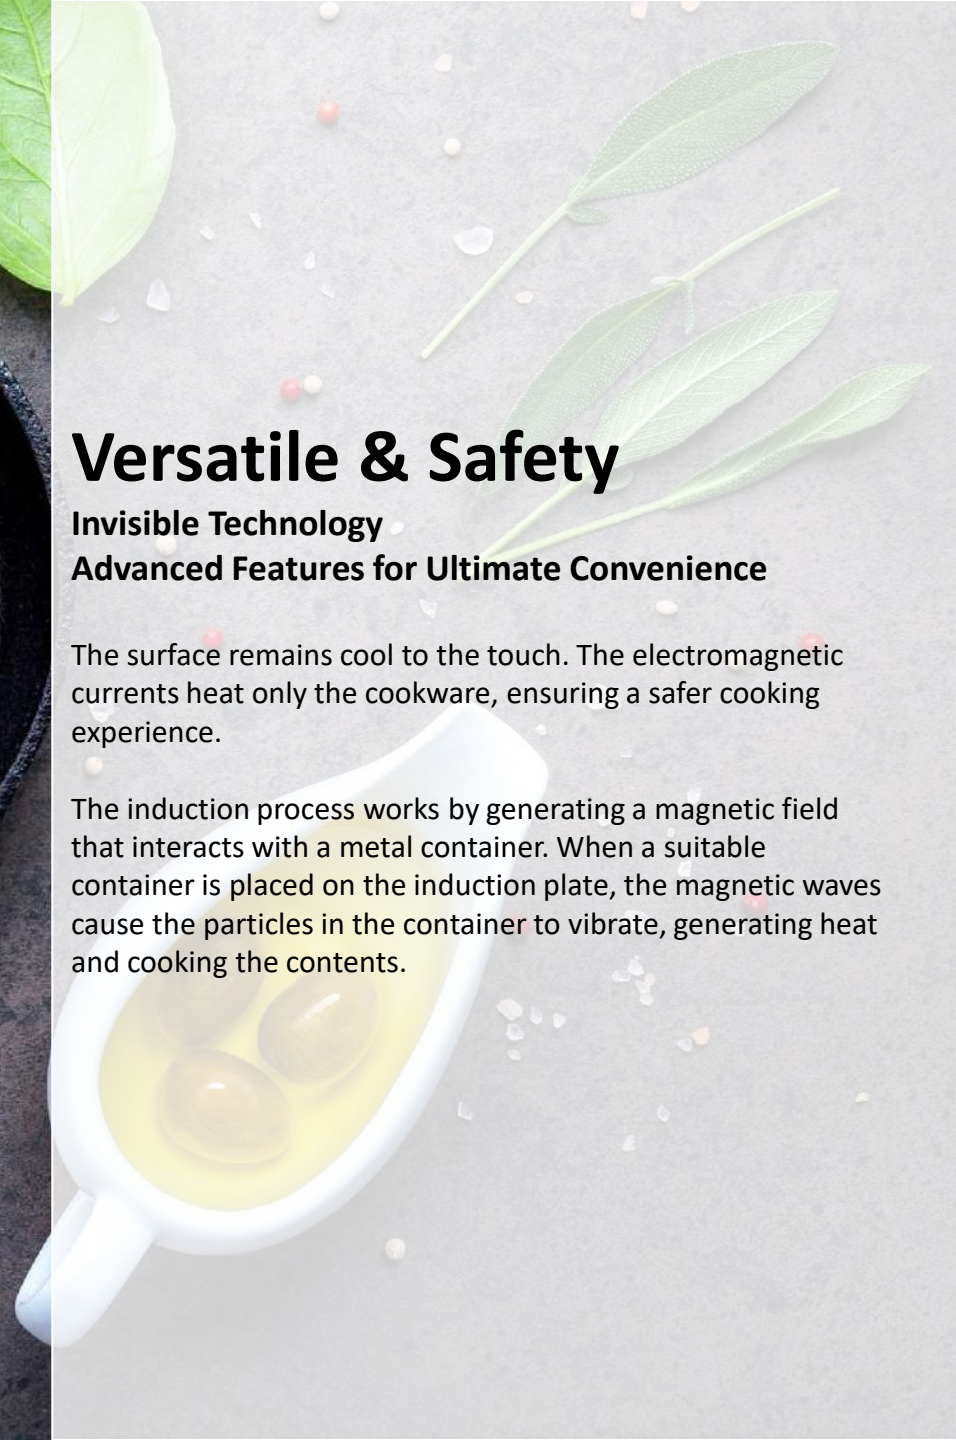

Versatile & Safety

Invisible Technology

Advanced Features for Ultimate Convenience

The surface remains cool to the touch. The electromagnetic currents heat only the cookware, ensuring a safer cooking experience.

The induction process works by generating a magnetic field that interacts with a metal container. When a suitable container is placed on the induction plate, the magnetic waves cause the particles in the container to vibrate, generating heat and cooking the contents.

Induction Hob**

How does the Invisible Built-In Induction Hob Cooktop work?

It is designed to be installed beneath your countertop. Utilizing the innovative Invisible-Induction Technology, it heats your cookware directly through the countertop, ensuring efficient energy use without waste.

Since it doesn't produce direct heat, your countertop remains safe to use as a regular surface when not in use for cooking.

Its controller can be conveniently installed into your countertop, backsplash, or even in a drawer.

Technical Specification

Voltage :220V

Power: 2000W

METAL case

Timer function

Child safety lock function

Auto off function

Residual heat warning

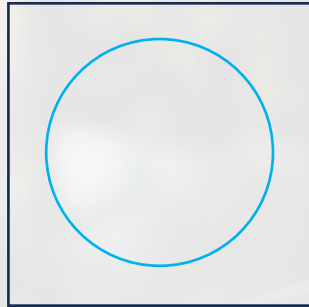

Touch control

Slab thickness 12-18mm

3-year guarantee
