

Mega Slabs Collection 2025

Candia Mega Slabs

Grandi lastre che offrono infinite possibilità di design. Le lastre Candia, che sono emblema del “Made in Italy”, forniscono gres porcellanato di alta qualità in formato 160x320 cm. La migliore tecnologia esistente e le grandi varietà di design permettono di adattare le nostre lastre all’utilizzo per mobili, pavimenti, rivestimenti e facciate ventilate.

Large slabs that give endless design possibilities. Candia Mega Slabs, which are emblematic of ‘Made in Italy’, provide high quality porcelain stoneware in large format of 160x320 cm. Cutting-edge technology and large variety of aesthetic designs allow to satisfy every intended uses as furniture branch, floor and wall coverings and the ventilated facades.

瓷质砖大板，无限设计可能。Candia Mega Slabs 精选的陶瓷大板，象征卓越的‘意大利制造’商品，160x320 cm超大规格，高科技的工艺，配合其卓越花色、品种丰富，可广泛应用于橱柜台面、室内墙地面、卫浴空间、家具、外墙等各类空间中。

Candia Mega Slabs

MOVIMENTAZIONE E STRUMENTI CONSIGLIATI SUL CANTIERE

HANDLING AND RECOMMENDED TOOLS ON SITE 大板运输方式及注意事项

Le casse (o cavalletti) devono essere inforcate dal lato lungo con le forche da 2,5 mt. Le lastre devono essere movimentate in verticale e nel caso di ponti l'imbragatura deve essere fatta con corde di canapa (sconsigliate catene di acciaio) per evitare rotture e/o sbeccature. In caso di stoccaggio su cavalletti di metallo questi devono essere rivestiti (legno o gomma).

Cases (or stands) must be lifted from the long side by placing 2.5 m long forks under them. Slabs must be vertically handled and, in case of bridges, the slinging must be made using hemp cloth (steel chains are not recommended) to prevent any breakage and/or chipping. In case of storage on metal stands, the latter should be coated (wood or rubber).

Per prese multiple si consiglia di utilizzare un bilancino e delle cinghie in tela distanziate sul fondo e sulla parte superiore da uno spessore in legno di lunghezza leggermente superiore al pacco lastre (come mostrato in figura 2). In questo modo la tensione esercitata durante la movimentazione non grava sulle lastre evitando rotture del materiale Attenzione: verificare sempre la portata massima di carico.

For multiple grabs, the use of a lifting beam is advised, with canvas straps spaced out on the base and on the top by a wooden spacer slightly longer than the slab pack (as shown in figure 2). In this way the tension generated during handling is no applied to the slabs, avoiding the breakage of the material.

Warning: always check the maximum load.

**NON SOVRAPPORRE MAI VOLUMI DIVERSI, PER EVITARE ROTTURE
TO AVOID BREAKAGE, NEVER STACK DIFFERENT VOLUMES**

Per la movimentazione è consigliato utilizzare i kit in alluminio appositamente studiati per le lastre. I kit, dotati di ventose, limitano le torsioni e consentono il trasposto sia manuale (sempre in verticale) che su carrello. Per la movimentazione manuale sono necessarie 4 persone, movimentando in verticale dal lato lungo.

Use of the aluminium kits specially designed for the slabs is recommended for handling. The kits, with suckers, limit torsion and permit transport (always vertical) both manually and on forklift. 4 people are required for manual handling, handling vertically from the long side.

INFORMAZIONI SULLA POSA
LAYING INFORMATION 铺设大板注意事项

TRADITIONAL FLOOR LAYING

Description and technical features

CANDIA Mega Slabs require the adhesive to be applied both on the setting bed and on the back of the slab.

For flooring require the following conditions:

- A flat surface;
- Clean and free from dust, scraps and any lumps of cement;
- The setting bed must be uniform and have already undergone the drying shrinkage process;
- Repair of any cracks;
- Any uneven parts on the surface must be filled with suitable levelling compounds.

Instruments required

- Cement-based powder adhesive for full spread, class "C2E according to EN12004 and S1 according to EN12002 standards";
- 3x3 mm square toothed trowel and 15 mm round toothed trowel;
- Frame with suction cups for handling or double suction cups;
- Non-bounce plastic mallet 170x370 mm;
- Levelling system: base clip + wedge + pliers.

Processing stages:

BONDING TO THE FLOOR

- 1) Ensure that the surface to be covered is solid, flat and free from dust and oil/grease.
- 2) Use the adhesives described above mixed according to the specifications indicated in the technical data sheet of the chosen adhesive.
- 3) Spread the adhesive onto the surface to be covered with a 15 mm round toothed trowel across an area of 5/10 cm more than the dimensions of the slab.
- 4) With the slab in a vertical position on the handling frame, spread the adhesive onto the back of the slab with a 3x3 mm square toothed trowel.
- 5) Using the frame with suction cups, bring the slab into a horizontal position and lay it.
- 6) To guarantee uniform bonding of the slab, the special 170x370 mm non-bounce plastic mallet must be used, tapping from the middle towards the edges so as to remove any air pockets between the back of the slab, the adhesive and the surface to be tiled.
- 7) Using the levelling system

LEVELLING SYSTEM

The levelling system aims to guarantee perfectly levelled floors simply and quickly, eliminating any unevenness between the slabs.

The levelling system is strongly recommended for laying **CANDIA Mega Slabs**.

Instruments required

- Base clip;
- Wedge;
- Adjustable pliers for installing floors/wall tiles.

Application of the levelling system

Positioning the base clip:

- a) After spreading the adhesive, insert the base clip below the **CANDIA Mega Slabs** on the 4 sides.
- b) Depending on the format of the slab, position one or more supports for each side of the slab.
- c) Position the slab.

Inserting the wedge:

- a) Insert the wedge in the slot of the support, taking care not to exceed the breaking point.
- b) To make inserting the wedge easier, it is recommended to use the adjustable pliers.

Removing the support:

- a) Once the adhesive has dried, the protruding part of the support can be separated from the base clip by tapping with your foot in line with the joint.

WALL COVERING WITH HIDDEN MECHANICAL SAFETY HOOK

The laying system with hidden mechanical safety hook on 6 mm **CANDIA Mega Slabs** allow the wall covering to be installed in complete safety with a great impact.

For this application system, the **CANDIA Mega Slabs** are pre-processed in the factory, so that it is delivered to the site already equipped with the hidden mechanical safety hook, sealed onto the back of the slab and complete with protective film on the back.

Instruments required

- Handling frame with suction cups;
- Cement-based powder adhesive for full spread, class "C2E according to EN12004 and S1 according to EN12002 standards";
- 15 mm round toothed trowel;
- 3x3 mm square toothed trowel;
- Gas-powered nailing machine and relative nails

BONDING TO THE WALL

- 1) Ensure that the surface to be covered is solid, flat and free from dust;
- 2) Cement-based powder adhesive for full spread, class "C2E according to EN12004 and S1 according to EN12002 standards";
- 3) Spread the adhesive onto the surface to be covered with a 15 mm round toothed trowel across an area of 5/10 cm more than the dimensions of the slab;
- 4) With the slab in a vertical position on the handling frame, spread the adhesive onto the back of the slab with a 3x3 mm square toothed trowel;
- 5) Using the handling frame in a vertical position lay the slab;
- 6) Before releasing the slab from the handling frame, ensure that the adhesive will hold it in place;
- 7) To guarantee complete bonding of the slab and eliminating any air, tap from the middle towards the edges using the non-bounce plastic mallet;
- 8) Before bonding the next slab, fix the hidden mechanical hook to the wall with the relevant nails (length 27 mm) using the gas-powered nailing machine. In order to guarantee that the mechanical hook is properly fixed, it is recommended to use the suitable gas-powered nailing machine, which can ensure a constant supply of energy.

PULIZIA, MANTENIMENTO E CURA

CLEANING, MAINTENANCE AND CARE 清洁、维护和保养

Per la pulizia quotidiana è consigliata acqua tiepida ed eventualmente un detergente di uso quotidiano, per sporchi più intensi sono consigliati:

- **Acido:** detergenti acidi, disincrostanti, rimuovi cemento es. Viakal.
- **Alcalino:** detergente basico, ammoniaca, sgrassante es. Chante Clair, Cif.
- **Solvente:** solvente universale, diluente, acquaragia, alcol
- **Ossidante:** candeggina, acqua ossigenata.

Dopo l'utilizzo sciacquare sempre abbondantemente con acqua.

For daily cleaning, lukewarm water and possibly a household detergent are recommended. The following are recommended for heavier dirt:

- **Acid:** acid detergents, de-fouling cleaners, cement remover e.g. Viakal.
- **Alkali:** basic, ammonia, degreasing detergent e.g. Chante Clair, Cif.
- **Solvent:** universal solvent, thinner, turpentine, white spirit, alcohol
- **Oxidant:** bleach, hydrogen peroxide.

After use, always rinse well with plenty of water.

GUIDA ALLA RIPARAZIONE:

Riparare piccolissime sbecature è possibile. Le mani esperte possono ripristinare piccolissime sbecature con delle resine epossidiche anche se non è semplice trovare i giusti toni e ripristinare la superficie originale. Una volta riparata la sbecatura, rimuovere la resina in eccesso con un panno imbevuto di acetone prima che indurisca. Una volta indurita lavorare la resina manualmente per omogenizzarla alla superficie.

GUIDE TO REPAIR:

Very small chipping can be repaired. Expert hands can restore very small chipping with epoxy resins, even though it is not easy to find the right tones and restore the original surface. Once the chipping is repaired, remove the excess resin with a cloth soaked in acetone before it hardens. Once it has hardened, work the resin by hand to make the surface uniform.
